

3.2.S.1. General Information [{Drug Substance Name}, {Manufacturer}]

2. **STRUCTURE [{DRUG SUBSTANCE NAME}, {MANUFACTURER}]**

For NCE:

The structural formula, including relative and absolute stereochemistry, the molecular formula, and the relative molecular mass should be provided.

For Biotech:

The schematic amino acid sequence indicating glycosylation sites or other posttranslational modifications and relative molecular mass should be provided, as appropriate.

Structural Formula

{Structural Formula}
